World Leaders in Automotive Key Programming Equipment

21st Century Car Key Programming Discover Software For All Makes

The TCodePro car key programmer is the leading key and remote programmer for all makes and models worldwide. The TCodePro is ideal for auto technicians a locksmiths providing high quality key and remote

programming services for drivers on the roadside, at home, or the office.

The use of transponders in vehicle keys means that whenever additional / replacement keys or remotes are required, they must be programmed into the vehicle using specialist diagnostic equipment. Originally, if a customer needed additional keys or remotes, they would have no option but to go to the franchised dealer, which could be expensive and inconvenient.

So choosing the TCodePro can be a worthwhile asset and generate an excellent return on investment, by providing an additional income stream for your business. We design, develop and manufacture all of our products to the highest standard. This insures we provide you the latest innovative tools used by professional locksmiths in the marketplace.

The Original Key Programmer

Advanced Diagnostics are the original innovators and manufacturers for aftermarket key programming tools in the world. Our products first appeared in the market in July 2000 and since then we have been leading the way providing locksmiths essential key programming equipment and software. Designed with simplicity in mind, the TCodePro simply guides you through various processes for key & remote fob programming from the more basic keys, to proximity and smart keys. Some vehicle immobilizer systems require security access (Pin Code) to allow keys / remotes to be programmed. The TCodePro can read many Pin Codes, and where they cannot be read, Advanced Diagnostics offer a service to customers to obtain Pin Codes.

The software coverage offered by Advanced Diagnostics is extensive and developed for all makes of vehicles. Currently, our list of software consists of over 60 car manufacturers worldwide. The software modules can be purchased as required and downloaded easily online direct onto the TCodePro 24hrs a day. The distinct advantage of using the TCodePro, is that you can purchase just the software that you require, when you require it. Providing a high quality, cost effective and valuable service for drivers has never been easier.

Protecting Your Investment

Copied by many, mastered by one, Advanced Diagnostics are pioneers and a trusted name in the key programming market. The TCodePro is designed with inbuilt security which keeps your investment protected. For additional security, a smartcard and calculator is supplied. This works in a similar way to the security devices used by the banking industry, i.e. the calculator prompts the user to enter a numeric response code on the TCodePro during the programming procedure. This response code is generated via a smartcard once inserted into the calculator.

Previously drivers had to book and arrange recovery of their car to a dealership for key programming. Now you can be part of this exciting & lucrative market too, by offering drivers mobile key programming services with the TCodePro.

"We rely on AD Pro Series Programmers because AD has continued to lead the industry with new software that allows us to program more vehicles. The products we have purchased from Advanced Diagnostics are well made, reliable, durable and easy to use."

Tom E Appel - CPL, Keys For Cars, Berkeley, California

Functionality

- All Makes Coverage
- Provide Roadside Programming For Drivers
- Read & Clear Fault Codes
- Clear Key Memory
- Program Keys
- Program Proximity / Smart Keys
- Program Remote / Plip Keys
- Program Aftermarket & OEM Keys
- Program Aftermarket & OEM Remote Key Fob's
- Read Immobilizer Pin Codes
- Read Pre-Code Data
- Display Live Data
- Component Actuation
- ECU Identification
- Simple User Interface

Some of the functions are manufacturer / model dependent

AD Services

- Access to Info Quest - An Online Portal Containing a Wealth of Technical Information
- Access To The Website Forum
- Pin Code Services Online & Built-In
- Free Software Updates (For Purchased Software Only)

Why Advanced Diagnostics?

- World Leaders For Key Programming Equipment
- Easy To Use Products
- Worldwide Distributor Network To Support Locksmiths in Most Countries
- Free Technical Support Hotline Provided by Your Local Distributor
- Develop & Design All Hardware & Software In-House, In The UK
- Provides High Quality Products
- Continuous Software Development Program

TCodePro Kit Includes

- TCodePro Programmer
- Software (As Ordered)
- Smartcard & Calculator
- Protective Carrying Case
- Neoprene Tester Case
- Operating Manual
- Cables & Dongles
- Dongle Case
