

**New Software Release Ford® 2019  
ADS2269 - Code D753712AD  
FIRST AFTERMARKET SOLUTION IN THE WORLD**

March 2019

Advanced Diagnostics is pleased to announce the release of Ford® 2019 ADS2269 software for the Smart Pro only. The new software is for programming proximity keys on various Ford® vehicles worldwide.

**What does the software do?**

ADS2269 software is designed specifically to program proximity keys for 2018-2019 vehicles and earlier year models that have been into a dealership and received a security software update. ADS2269 will bypass the security pincode during the procedure and will program the remote and the transponder at the same time. No working key is required and there is an add key option available.

There is also a special procedure that will allow programming on some models even if the factory alarm system is activated.

**What else will I need?**

Smart Pro

\* Emergency blade

Active alarm procedure may not work in all cases; if the vehicle is equipped with a keypad it may be easier to obtain the keypad code and use it to disarm the active alarm. 2019 vehicles are still in production at the time of this software release, so there is no guarantee that Ford® does not change or update security beyond the capabilities of this software.
