

Technical Features

- Powered by Tester
- On-Board Memory
- Automatically Configurable to The Vehicle
- Updated via the AD Loader Program
- Hardware Expansion Port - **SMART EEPROM Reader & SMART Aerial (ADC242)**
- USB Port for Future Applications
- Weight - 175 Grams
- Size - 98mm(W) x 84mm(H) x 34mm(D)

Why Advanced Diagnostics?

- World Leaders For Key Programming Equipment
- Easy To Use Products
- Worldwide Distributor Network To Support Locksmiths in Most Countries
- Free Technical Support Hotline Provided by Your Local Distributor
- Develop & Design All Hardware & Software In-House, In The UK
- Provides High Quality Products
- Continuous Software Development Program

World Leaders In Automotive Key Programming Equipment

One Dongle - One Solution

The innovative Smart Dongle developed for Pro testers designed by Advanced Diagnostics has many new features and benefits for the automotive locksmith.

Smart Dongle provides 'one easy to use solution' by replacing the current range of dongles with one automatic configurable dongle.

Integration of the security calculator and smartcard is a significant benefit by automating the security process.

A hardware expansion port allows additional functionality to be added in the future.

The Smart Dongle's on-board memory incorporates the functionality of the ADC198 Nissan PIN Code Dongle & ADC190 Hyundai / Kia PIN Code Dongle, which are available as optional software add on's.

SMART Dongle

For Locksmiths & Auto Technicians

Simple, easy to use & saves time

Functionality

- Automatically Configures Tester for Car Key / Remote Programming
- Replaces Current Range of Dongles (Except Dongle B)
- Can Be Used On All Makes Of Cars Worldwide
- User Friendly & Portable
- Integrated Smartcard / Calculator Security
- Integrated Nissan & Hyundai / Kia PIN Code Dongles**
- Expansion Port For Additional Hardware:
 - Smart EEPROM Reader*
 - Smart Aerial For Transponder Reading & Pre-coding*

* **Optional Modules - Additional Costs Apply**
**** Existing ADC198 & ADC190 Customers Will Have This Functionality Added Free**

SMART EEPROM READ / WRITE

With the addition of the Smart EEPROM cable you will be able to read EEPROM data to generate transponders and read PINCODES directly from EEPROM's.

Full functionality TBA.

Available Soon

Smart Dongle is Suitable For Use With
 AD100Pro, MVPPPro, T-Code Pro &
 Premium Code Pro

TRANSPONDER PROGRAMMING

Connecting the Smart Aerial (ADC242) to the Smart Dongle allows transponders to be pre-coded and programmed directly to the vehicle using only the Pro tester.

Smart Aerial makes pre-coding transponders quick & simple.

Available Soon

Connect & Go

SMARTCARD BUILT-IN

The Security Calculator & Smartcard have been integrated into the Smart Dongle.

This means no more entering security codes on the calculator and tester as this process is automatic, making key programming easier, quicker and more streamlined.

Note: Smartcard Feature is Only Available For One Registered Tester.

ONE DONGLE FOR ALL CARS

Previously the correct dongle needed to be selected and in some cases multiple dongles used when programming transponders, remotes or reading PINCODES for the same vehicle.

Now, simply connect the Smart Dongle to your Pro tester and it will automatically configure itself for the vehicle it is connected to.
